Hey Nic,

I know things are really ramping up and crazy. Here at the HQ EOC we are getting requests from Ryan Jackson, and other EPA Senior Leaders for DW and WW system information. The Water Program is preparing to send any folks who haven't already deployed out the door. They asked if we could help them out by accessing RM and exporting the data so we can filter it for whatever the request of the day is from the Senior Officials.

I am the best person to do this since I have RM experience but my RM password has expired. I would like to try to get the exports from the Website since I got a new computer and no longer have the RM software on my desktop. If I can export from the website, then I literally only need to get my password reset. Use WaterRocks1 as my new password please!

Thanks, and good luck! Thinking about you guys!

Harvey Response:
PWS Operational
Status Codes and Eval
Forms**

The DW and WW data will be in the RM with the information fields needed. REOC will continue to send the daily sitreps, but they will likely just include summary information on DW and WW status. Your team could help out by exporting the more detailed data from RM into Excel or whatever format is preferred for HQ updates if that's possible.

Thanks,
Jim

Jim, thanks for
the update.
Just to
confirm, will
your team or
the REOC send
daily to the
Water Desk in
the HQ EOC an
Excel export
from Response
Manager for all
assessed
systems (which
would include
county/location,
pop served,
status code, etc
for each
system)? I
think this
approach
makes the
most sense,
rather than
have you all
develop data
tables for every
separate
inquiry from
the AO's office.
